HYDRANGEAS

Grown in Tubs for Summer Blooming

We have a magnificent lot of large plants grown in tubs and half-barrels for July and August flowering.

We have made a specialty of these for years, and find an increasing demand for them from year to year. Plants are well budded and begin to show color early in July, and are in perfection during July and August—the time of year when they are most in demand. When in full bloom they are covered with their showy flowers. Nothing is showier or more satisfactory for lawn or piazza decoration. They are particularly beautiful for lawn decoration at watering places and other summer resorts. They can be wintered in a pit or cold cellar, and increase in size and beauty from year to year.

These plants can be shipped up to July 1st by freight with perfect safety to any point east of the Mississippi River.

The Standard Pink Variety

An extra fine sort. Very bright pink.

CEDAR BEAN POLES

We have just received a fine lot of Cedar Bean Poles. These are by far the cheapest and best bean poles that can be used, as they will last two or three times as long as any other kind of wood. Cedar bean poles are getting very scarce. Order while they last. Our poles are extra fine and straight.

12 feet and over in length, \$6.00 per dozen.

This price is at the nursery at Scarborough, N. Y.

Delivery charged extra at cost.
